

"Corrections" for Gilford House

- ① Master Bedroom - If there is no way to give room a minimum width of 2 meters (so that bed can fit against southern wall), then the whole bedroom/study area has to be reworked.
- ② Ceiling Heights - All ceilings seem very high to me; preferred are
 - 2.8 m in salon + kitchen
 - 2.5 m in bedrooms/study
- ③ Sliding Glass door in living room to patio (instead of double window + door)
- ④ sliding door (not hinges) from entry way into utility room
- ⑤ only 1 western window in study (need wall space for shelves)
- ⑥ because of the downward slope/steps to front door, will there be a problem with watershed?
